Archana Srinivasa Murthy

Liverpool, UK | archanaasrinivasaa@gmail.com | github.com/archdoesthings | GitHub

PROFESSIONAL PROFILE

Data analyst with an MSc in Advanced Data Science and Artificial Intelligence (University of Liverpool, results pending) and a first degree in Information Systems and Management. Builds automated data pipelines, cleans and validates messy data, and presents findings through interactive dashboards. Hands-on with Python, SQL and Excel; careful with detail and quick to learn new tools.

TECHNICAL & PROFESSIONAL SKILLS

- Languages & Tools: Python (NumPy, Pandas, Matplotlib, Scikit-learn, NetworkX), SQL (SQLite), Microsoft Excel, Flask, Power Automate, REST APIs
- Data Competencies: Data Pipelines & ETL, Data Cleaning & Validation, Exploratory Data Analysis, Statistical Analysis, Network Analysis, Data Visualisation
- Soft Skills: Analytical Thinking, Attention to Detail, Communication, Independent Learning, Teamwork

EDUCATION

University of Liverpool **Liverpool, UK**
MSc Advanced Data Science and Artificial Intelligence *09/25 – 09/26 (results pending)*
Relevant Coursework: Big Data Analytics, Data Mining and Visualisation, Machine Learning and Bioinspired Learning, Optimisation.

Manipal Academy of Higher Education **Dubai, UAE**
BSc Information Systems and Management *09/21 – 09/24*
Minor: Software Management. CGPA 9.19/10

PROFESSIONAL EXPERIENCE

University of Liverpool (British Music Experience Project) **Liverpool, UK**
Software Developer Intern (began as MSc group project, now moving to live deployment) *06/26 – Present*
- Built interactive React screens for a live museum installation (DJ deck and instrument screens)
- Built gesture-recognition features using Leap Motion sensor input, supporting 4 distinct gesture controls for real-time exhibit interface control
- Preparing user testing at the October summit; gesture data will inform refinements before November deployment

Brighter Admission Consultant DMCC **Dubai, UAE**
Educational Research Analyst Intern *04/25 – 07/25*
- Compiled structured university and course data from academic sources and integrated it into the company's CMS

Sobha Constructions **Dubai, UAE**
IT Intern *07/23 – 09/23*
- Achieved 100% data compliance across employee HR datasets by validating and standardising records for an HRMS migration
- Reduced HR workflow processing time by ~40% by automating manual processes using Power Automate
- Decreased repeat IT support queries by building an AI-powered internal onboarding video guide

PROJECTS

- **UK Gig Tracker (ongoing) | SQLite, Ticketmaster, Skiddle and MusicBrainz APIs**
  - Built an automated daily pipeline collecting every upcoming UK and Irish music event from the Ticketmaster and Skiddle APIs into a SQLite database, now holding 17,800 events across 2,700 venues and 4,000 artists
  - Cleaned messy location data by mapping venues to cities using coordinates and postcodes, catching source errors such as venues listed with another city's coordinates; matched artists to album release dates through MusicBrainz to analyse how tours line up with releases
- **Social Network Analysis | Python, Scikit-learn, NetworkX, Flask**
  - Built a directed graph of 1,520 Wikipedia pages and 10,103 hyperlinks in NetworkX and computed five centrality metrics to identify structurally significant topics, visualised in an interactive Flask + vis.js dashboard
